## Virtual Internship - Android Application Development using Kotlin

### Grocery Application Using Kotlin

In this project, we are going to build a grocery application in android using android studio. Many times we forget to purchase things that we want to buy, after all, we can't remember all the items, so with the help of this app, you can note down your grocery items that you are going to purchase, by doing this you can't forget any items that you want to purchase. A sample image is given below to get an idea about what we are going to do in this article. Note that we are going to implement this project using the Kotlin language. In this project, we are using MVVM (Model View ViewModel) for architectural patterns, Room for database, Coroutines and RecyclerView to display the list of items.

grocery app			
Tomato	3	Rs.50	
Total Cost		Rs.150	
Beans	2	Rs.30	
Total Cost		Rs.60	
Carrot	1	Rs.20	
Total Cost		Rs.20	
Apple	1	Rs.100	
Total Cost		Rs.100	
Mango	2	Rs.150	
Total Cost		Rs.300
